evansdev.vercel.app | Accra, Ghana

EDUCATION

University of Ghana | *Ranked 1st in West Africa*
B.Sc. Computer Engineering | First Class Honours

Jan 2022 – Sep 2025

Africa to Silicon Valley (A2SV) | *Backed by Google*

May 2023 – May 2025

- Intensive software engineering program with a **70% placement rate** at top tech companies

SKILLS & PROFICIENCIES

- **Languages:** JavaScript (ES6+), TypeScript, Python
- **Databases:** PostgreSQL
- **Frameworks & Technologies:** React, Flutter, Express.js, Vue.js, NestJS, Tailwind CSS
- **Tools & Methodologies:** Git, GitHub, Docker, AWS, Postman, Figma, CI/CD, Agile Methodologies

PROFESSIONAL EXPERIENCE

WeWire | *Junior Software Engineer*

Oct 2025 – Present

- Designed and developed **REST APIs** for trade management, including status transitions, validation, and accounting journal entry creation
- Integrated **RTK Query** for state management and API caching, improving frontend performance and data caching

Atlas Labs Ventures | *Full Stack Developer*

Jun 2025 – Sep 2025

- Developed a full-stack **AI-powered tutoring platform** using Vue.js, TypeScript, Express.js, and PostgreSQL, implementing **50+ RESTful API endpoints** with JWT and Google OAuth authentication
- Integrated an intelligent chat system that combines **multiple AI models** (Claude API, OpenAI API & Deepseek) with file attachment support via Cloudinary, enabling real-time educational conversations
- Implemented **Stripe payment processing** and session management with persistent conversation history and token usage tracking to support scalable SaaS delivery

Digiits Agency | *Junior Software Engineer*

Jun 2024 – May 2025

- Designed **15+ responsive UI components** using TypeScript, React, and Tailwind CSS within an Agile framework, leveraging CI/CD practices and RESTful API integrations to enhance user engagement
- Collaborated with a 5-person cross-functional team using Scrum methodologies to streamline development cycles and implement robust **unit testing protocols**, significantly enhancing code reliability

PROJECTS

Gulgii | *React, TypeScript, NestJS, PostgreSQL*

gulgii.com

- Built a two-sided food marketplace with separate customer and cook **PWAs** (React, TypeScript), plus a NestJS API (Prisma, PostgreSQL) for auth (JWT, OTP), discovery, menus, orders, and Paystack payments
- Shipped end-to-end flows for cooks (onboarding, menus, order management) and customers (browse, ordering, and real-time updates), with responsive UIs and secure session handling

LifeGuard | *React, Node, .NET, Flutter, PostgreSQL, AI/ML*

github.com/evansachie/LifeGuard

- Created a health and environmental monitoring system using Arduino Nicla Sense ME board with **9 integrated sensors**, capturing real-time biometric and environmental data across temperature, air quality, and vital physiological parameters
- Engineered a full-stack solution with Flutter mobile app, React dashboard, and .NET backend, implementing real-time data visualization, **ML-powered anomaly detection**, and secure data management with PostgreSQL

Swipe | *React, Typescript, NestJS, PostgreSQL*

swipe.ltd

- Built a **no-code SaaS business page builder** for African freelancers and creators, and a **double-entry ledger system** managing storefront payments, refunds, and chargebacks across merchant accounts
- Implemented full subscription billing via **Paystack** (plan checkout, webhook lifecycle, cancellation flows); a Mobile Money vendor payout system with transfer fee handling; and multi-tenant flows covering orders, bookings, and invoices

ACHIEVEMENTS & LEADERSHIP

EthAccra Hackathon | *Winner*

github.com/Serkhani/terraledger

- Co-created TerraLedger, a decentralized app for buying and selling land using Next.js, Solidity, and Smart Contracts, which earned **\$900** during the ETHAccra hackathon, a premier web3 and blockchain event

Makerspace Ghana | *STEM Instructor*

github.com/evansachie/Gesture-Recognition

- Taught electronics and coding to **15+ K-12 students**; developed a Gesture Recognition system using TinyML and Arduino
